

## STRONG & COST EFFECTIVE PROTECTION

**Bulk Handling  
Australia Group  
Pty Ltd supplies  
2 styles of Hide  
Liner for various  
applications**

All Hide Liners feature folded and reinforced edges for strong eyelet application.

This makes the Hide Liners strong enough to withstand forklift access and along with our elastic tie method makes them the best performing in the market today.

BHA's Hide Liners are designed to reduce leakage and associated problems that can occur when shipping hides.

In addition to our standard designs we can tailor designs to meet your specific needs.

**Contact us to discuss your Hide Liner needs**

BHA - Innovation • Quality • Service Excellence

## 20FT WIDE ACCESS HIDE LINER

- Made from strong woven PE film double sided coated and features 20 m of lashing rope.

- This design provides a basic cost effective Hide Liner design providing base and  $\frac{3}{4}$  wall height coverage.
- The wide access design allows for fork lift access for loading and extended door end length allows for good folded door end coverage once loading is complete.

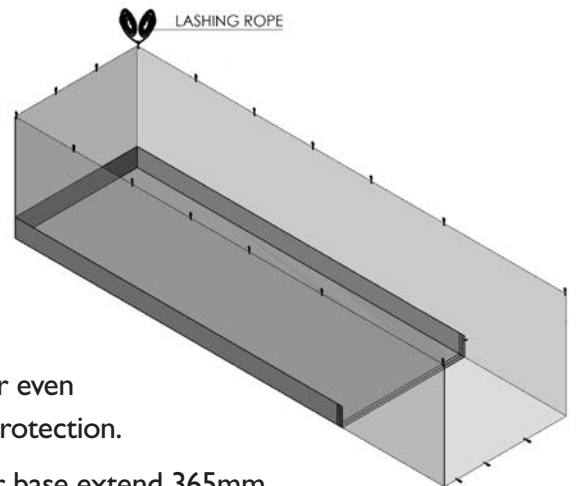

## 20FT REINFORCED WIDE ACCESS HIDE LINER

- Made from strong woven and double sided coated PE and featuring 20 m of lashing rope.

- Features an additional floor reinforcement for even greater leakage protection.
- The double Layer base extend 365mm up the sides of the liner.
